British physicist, Alan Pritchard invented the word "bibliometrics" in 1969. The word Bibliometrics is a combination of two words: (1) "bibliography" and (2) "metrics", where bibliography means a list of books or journal articles and metrics means a system or standard of measurement. Bibliometrics is the application of mathematical and statistical techniques for the study of books, journals, and other communication media. A bibliometric research method is useful for analyzing bibliographic data. Bibliometric studies are useful for effective library management. British physicist, Alan Pritchard invented the word "bibliometrics" in 1969. The word Bibliometrics is a combination of two words: (1) "bibliography" and (2) "metrics", where bibliography means a list of books or journal articles and metrics means a system or stand of measurement. Bibliometrics is the application of mathematical and statistical techniques for the study of books, journals, and other

communication media. A bibliometric research method is useful for analyzing bibliographic data. Bibliometric studies are useful for effective library management. The present study has been undertaken in order to study bibliographic information of articles in the “Journal of Librarianship and Information Science” for the period 2018-2022.

### **Journal of Librarianship and Information Science-**

The Journal of Librarianship and Information Science is a peer-reviewed academic journal that publishes research articles, critical reviews, and scholarly essays in the field of library and information science. The journal is published quarterly by SAGE Publications and was first published in 1969. It has an international readership and contributors from all over the world. It is indexed in various databases such as Web of Science, Scopus, and the Library and Information Science Abstracts (LISA).

### **Vosviewer software**

VOSviewer is a software tool for creating maps based on network data and for visualizing and exploring maps from selected database. VOSviewer had simplified the process of bibliometric analysis through visualizing construct networks of scientific publications, journals, researchers, research organizations, countries, keywords, or terms.

### **Research Methodology**

The methodology applied in the present study is a **Bibliometric analysis** which is used to study in detail the bibliographic features of the articles published in the ‘Journal of Librarianship and Information Science’ during 2018-2022. The data is tabulated and analyzed for making observations by using **VOSviewer software and MS Excel**.

### **Objectives of the study**

- To study the Year-wise distribution of papers
- To make an analysis of the category of articles published in the Journal of Librarianship and information science

- To identify the Author-wise distribution of documents
- To identify the Institution-wise distribution of documents
- To examine the country-wise distribution of articles
- To study the occurrence and co-occurrence of keywords
- To make an Analysis of Co-Authorship based on the authors
- To study the Bibliographic Coupling of documents
- To study Co-Citation analysis of cited authors
- To study the Citation analysis of documents
- To make an analysis of Co-authorship based on countries
- To study Co-authorship based on organizations

### **Scope of the study**

The scope of the present study is restricted to the duration of 2018-2022. It covers five volumes and 20 issues of the journal entitled ‘Journal of Librarianship and Information. The 20 issues contain 323 articles.

### **Need for the study**

Periodicals are the indicators of literature growth in any field of knowledge. They emerge as the main channel for transmitting knowledge. Due to the escalating cost of the periodicals and lack of adequate library budgets the selection of any particular journal for a library should be done more carefully. Therefore, the library authorities are forced to reduce the number of journal subscriptions. Bibliometric analysis has many applications in the Library and Information science field in identifying the research trends in the subject, core journals, etc. and thereby framing a new subscription policy for future. These studies will be helpful for librarians to plan better collection development

### **Data Analysis and Interpretation-**

#### **1. Year-wise Distribution of Articles**

**Table-1**

Sr No.	Year	Documents	%
1	2022	58	17.95
2	2021	50	15.47
3	2020	91	28.17
4	2019	87	26.93
5	2018	37	11.45
<b>Total</b>		<b>323</b>	<b>100</b>

**Fig-1**

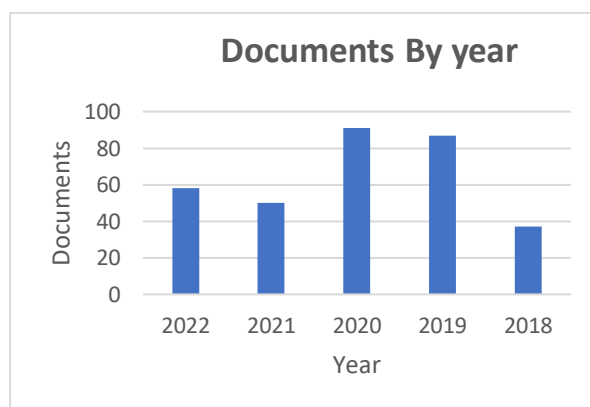

Table-1 reveals that, out of total 323 documents, the maximum numbers of articles (91, 28.17%) are published in the year 2020. The minimum numbers of articles (37, 11.45%) are published in the year 2018. Fig. 1, indicates the upward curve in terms of scholarly publication from the year 2018 to 2020. A declining phase is seen in year 2021. The reason might be COVID 19 PANDEMIC. However, the number of articles (50, 15.47%) has declined in year 2021, it is more than the minimum number of articles (37, 11.45%) published in year 2018.

## 2. Category-wise classification of papers

**Table-2**

Documents		%
Type	Documents	

Article	304	94.11

Total	323	100

**Table 2 Category-wise classification of papers**

**Fig 2**

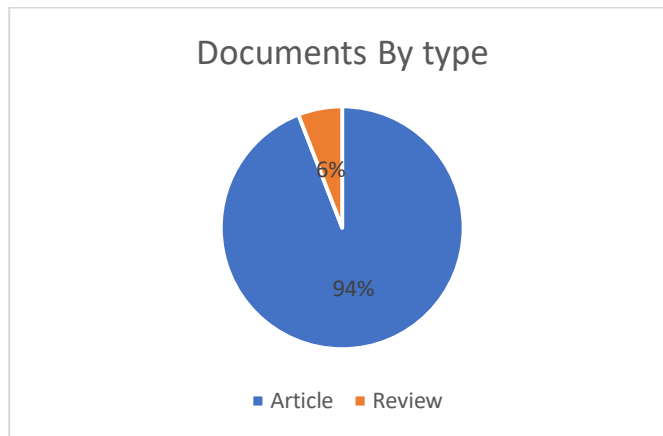

Table-2 focuses on the category-wise classification of the papers published from 2018 to 2022. The study reveals that the maximum number of scholarly articles are published i.e., 304, which are 94.11 % of the total publication. Whereas, 19 (5.88 % ) book reviews are published.

Authors of Institutions mentioned in Figure 13 have worked in collaboration for the publication of articles. Table 14 shows the clusters of authors who have worked in collaboration for the publication of articles. This type of collaboration can provide diverse perspectives and expertise that can lead to more comprehensive and impactful research output.

### **Conclusion**

Bibliometric techniques are being used for a variety of purposes like determination of various scientific indicators, evaluation of scientific output, selection of journals for libraries and even forecasting the potential of a particular field. The popularity of the adaptation of bibliometric techniques in various disciplines stimulated the stupendous growth of literature on bibliometrics and its related areas. Total **323** articles published from 2018 to 2022 in the **Journal of Librarianship and**

**Information Science**. the maximum number of articles published in the year **2020**. The Minimum number of articles published in the year **2018**. Most of the articles are contributed by the University of South Africa and the University of Tsukuba authors. **The United States of America** has contributed the highest number of articles. The highly occurred word is **Public libraries**, which means the articles in this journal particularly have focused on public libraries. Authors **Lo, Patrick**, and **Lopatovska** are the most prolific authors. A set of 48 **connected documents** are **bibliographically coupled**. Author **Julien, H.** is a highly cited author. Authors from **30 countries** have worked in collaboration.

**DETAILS ABOUT COURSE**

**Skill Based Course -Social Media Influencer Marketing**

**2023-24**

5. Eligibility	: Pursuing UG/PG
6. Duration	: 30 Hrs.(online)
7. Intake Capacity	: 45 Per Batch
8. Theory & Practical	: 30 Hrs. (20+10)

**Objective of the program:**

- Preparing the students for Influencer Marketing as Career Opportunity.
- To know the detailed working of this Industry.
- To know the social responsibility of being an Influencer.
- To work on different content & strategies.

**Brief Training Outline:**

**1. Introduction**

- A nano influencer has a fewer following base between 100 to 10k followers on a social media platform, but aims to become at least a micro-influencer with brand deals in order to accomplish true influencer status.
- What is the value of an influencer?
- What are you contributing to a brand as an influencer? The more successfully your projects or content is received, the more likely you are to establish your relevance as an influencer.

**2. Types of influencers**

- a. There are five types of influencers theoretically. This includes; nano, micro, macro and mega influencers. Mega influencers usually include celebrities, and macro influencers also have a strong fan / follower base due to years of experience and exposure, which boosted their relevance in promoting brands.
- b. What kind of influencer would you want to be?

- c. Influencers can be categorized on the basis of followers, niche, interests, methods, the main platform they are active on. What do you want to achieve? Setting a goal is the first step to achieving anything.

### **3. Types of content involved**

- a. Majority of the influencers only became extremely popular when they established a presence on more than one social media platform. It is also an excellent way to attract brand deals and sponsorships in your niche.
- b. Creating remarkable content
- c. The content created needs to stand out in a non-average way, and the quality needs to be of the highest level of creativity.

### **4. 2-step flow of communication**

- a. "A study on social influence of the 1940 presidential election found a 2-step flow of communication.." – the flow of communication from mass media sources to "influencers" which then flows to the followers through 'interpersonal influence.'
- b. Determining a target audience

### **5. Personal branding**

- a. How do you build your brand on the platforms you're present on? How to build your brand on platforms like Instagram as opposed to LinkedIn? What makes you special?
- b. What does good content look like?
- c. Graphics, entertainment, unique, relatable, sentimental, inspirational. Adding a personal touch with it always works, due to growing competition.

### **6. Tools for content creation**

- a. Basic influencer tools for content creation include:
- b. Optimal and free writing tools such as:
- c. ChatGPT - The basic version is completely free to use and can be used for instagram captions, descriptions of your content, blog ideas, etc. Though try not to depend heavily on an AI to make personalized content for your niche.
- d. Grammarly - has free plans. It allows you to enhance things like vocabulary, flow of writing, etc.
- e. Optimal and free image tools such as:
- f. Canva

### **7. Instagram strategy**

- a. Instagram is an algorithm based platform so posting several times during the day can lower your chances at engagement. However, even if you post everyday at an optimal time with a high engagement rate, you will be stagnant unless the quality of your content is different, stands out and is creative. Some exclusive campaigns that you can hold on instagram as an influencer are:
- b. Contests / Giveaways - user generated content can also be a part of the same.
- c. Monetized content - brand deals, sponsorships, collaborations, affiliate programs
- d. Instagram shop - there are influencers who have a dual objective of selling products or opening a small business that supports their foundation.

## Outcome of the Courses

1. It will help to improve employability of the students.
2. Students to have enhanced career opportunities in the field of Social Media Marketing.
3. Students to have Facilitators and Mentors from the professional domains.
4. Students will be able to understand the importance of Communication and Personality Development as a part of their career planning.

**Objective of the program:**

- Preparing the students for Influencer Marketing as Career Opportunity.
- To know the detailed working of this Industry.
- To know the social responsibility of being an Influencer.
- To work on different content & strategies.

**Brief Training Outline:**

**1. Introduction**

- A nano influencer has a fewer following base between 100 to 10k followers on a social media platform, but aims to become at least a micro-influencer with brand deals in order to accomplish true influencer status.
- What is the value of an influencer?
- What are you contributing to a brand as an influencer? The more successfully your projects or content is received, the more likely you are to establish your relevance as an influencer.

**2. Types of influencers**

- a. There are five types of influencers theoretically. This includes; nano, micro, macro and mega influencers. Mega influencers usually include celebrities, and macro influencers also have a strong fan / follower base due to years of experience and exposure, which boosted their relevance in promoting brands.
- b. What kind of influencer would you want to be?

- c. Influencers can be categorized on the basis of followers, niche, interests, methods, the main platform they are active on. What do you want to achieve? Setting a goal is the first step to achieving anything.

### **3. Types of content involved**

- a. Majority of the influencers only became extremely popular when they established a presence on more than one social media platform. It is also an excellent way to attract brand deals and sponsorships in your niche.
- b. Creating remarkable content
- c. The content created needs to stand out in a non-average way, and the quality needs to be of the highest level of creativity.

### **4. 2-step flow of communication**

- a. "A study on social influence of the 1940 presidential election found a 2-step flow of communication.." – the flow of communication from mass media sources to "influencers" which then flows to the followers through 'interpersonal influence.'
- b. Determining a target audience

### **5. Personal branding**

- a. How do you build your brand on the platforms you're present on? How to build your brand on platforms like Instagram as opposed to LinkedIn? What makes you special?
- b. What does good content look like?
- c. Graphics, entertainment, unique, relatable, sentimental, inspirational. Adding a personal touch with it always works, due to growing competition.

### **6. Tools for content creation**

- a. Basic influencer tools for content creation include:
- b. Optimal and free writing tools such as:
- c. ChatGPT - The basic version is completely free to use and can be used for instagram captions, descriptions of your content, blog ideas, etc. Though try not to depend heavily on an AI to make personalized content for your niche.
- d. Grammarly - has free plans. It allows you to enhance things like vocabulary, flow of writing, etc.
- e. Optimal and free image tools such as:
- f. Canva

### **7. Instagram strategy**

- a. Instagram is an algorithm based platform so posting several times during the day can lower your chances at engagement. However, even if you post everyday at an optimal time with a high engagement rate, you will be stagnant unless the quality of your content is different, stands out and is creative. Some exclusive campaigns that you can hold on instagram as an influencer are:
- b. Contests / Giveaways - user generated content can also be a part of the same.
- c. Monetized content - brand deals, sponsorships, collaborations, affiliate programs
- d. Instagram shop - there are influencers who have a dual objective of selling products or opening a small business that supports their foundation.

## Outcome of the Courses

1. It will help to improve employability of the students.
2. Students to have enhanced career opportunities in the field of Social Media Marketing.
3. Students to have Facilitators and Mentors from the professional domains.
4. Students will be able to understand the importance of Communication and Personality Development as a part of their career planning.
